**Limitations for Use**
Type C feed may be prepared from Type B feed containing 535.8 to 5,440 g/ton Decoquinate and 6,700 to 80,000 g/ton Chlortetracycline. Withdraw 24 hours prior to slaughter when manufactured from ChlorMax Type A medicated articles manufactured by Zoetis (Zoetis No. 054771). Limitations for Use: Type C cattle feeds may be manufactured from Decoquinate liquid Type B feeds having a pH between 5.0 and 6.5 and containing a suspending agent to maintain a viscosity of not less than 500 centipoises.

When consumed, feed 22.7 mg Decoquinate per 100 lb. bodyweight per day for a total of 28 days to prevent coccidiosis.

**WARNING:** Do not feed to animals producing milk for food. A withdrawal period has not been established for this product in pre-ruminating calves. Do not feed to calves to be processed for veal. Withdraw 24 hours prior to slaughter when manufactured from ChlorMax Type A medicated articles and Pennchlor Type A medicated articles. Zero withdrawal time when manufactured from Aureomycin Type A medicated articles manufactured by NADA sponsor No. 054771 (Zoetis).**

**CAUTION:** Do not use in feeds containing bentonite.
