

Summary of Fertilizer Tonnage Responsibilities  
In  
Kentucky

April 2006

All fertilizer tonnage reporting in Kentucky is quarterly. The Kentucky fertilizer law allows one registrant/licensee (Company) to report **for** another. Audit codes are assigned to each company that specifies who is responsibility for the report. Audit codes and tonnage reporting responsibilities are summarized below:

<b>Audit Code*</b>	<b>Tonnage reporting responsibilities</b>
21	No reporting required, sold in packages less than 10 pounds.
22	Reports are submitted by another company
24	Reports quarterly for self and any other company (Report must list all the companies the report is for.)

\* Tonnage reporting responsibilities are established at registration and may be changed at anytime if circumstances change.
