

Date: December 21, 2024

Sample ID: OL24NOV-1	Shipping Date: November 11, 2024
Material: Hemp Oil	Data Due Date: December 20, 2024

Dear Hemp PT Program Participants,

Thank you for your participation in the University of Kentucky Hemp Proficiency Testing (PT) Program.

This PT sample was a mixture of commercially available hemp extract oil products for human consumption. Label showed 20 mg CBD per 1 mL on Product A and 40 mg delta-8 THC per 1 mL on Product B. 300 mL of Product A was mixed with 30 mL of Product B.

Individual opaque glass vials were filled with 9 mL of composited oil. Homogeneity and stability was evaluated by analyzing total THC and total CBD via GC-FID and is presented in the Homogeneity and Stability report.

The final reports have been reviewed and authorized for release. The included reports are:

Summary Statistics	Individual Participant's Laboratory Trueness	Homogeneity and Stability
All Labs Precision	Individual Participant's Laboratory Precision	Methodology Survey
All Labs Trueness	Certificate of Analysis	

Summary reports and a guide about how to interpret proficiency testing reports are available at <http://www.rs.uky.edu/regulatory/hpt/reports.php>. Labs are identified by lab number on summary reports. Participants' identity will not be disclosed by us.

Individual reports are available through your lab portal at <https://hpt.fass.org/data-reporting/>. The individual lab reports are the property of the participating laboratories.

Any concerns or errors in the reports should be immediately communicated to [hpt@uky.edu](mailto:hpt@uky.edu). A timely investigation will occur and you will be advised of the outcome. Errors made by the participant in data entry cannot be changed after the reporting deadline and such errors are not grounds for appeal.

Sincerely,

Frank Sikora, Ph.D.  
Director of Hemp Proficiency Testing Program  
University of Kentucky  
Division of Regulatory Services
